Run The Application

Team ID : PNT2022TMID12745

Open the anaconda prompt from the start menu.
• Navigate to the folder where your app.py resides.
• Now type the "python app.py" command.
• It will show the local host where your app is running on
http://127.0.0.1.5000/
• Copy that localhost URL and open that URL in the browser. It does
navigate to where you can view your web page.
• Enter the values, click on the predict button and see the
result/prediction on the web page.
• Then it will run on localhost:5000
• Navigate to the localhost (**http://127.0.0.1:5000/**) where you can view
your web page.
• Click on the classify button to see the results.
